

REPLACING FORKLIFT HOSES

It's Time to Replace Your Hose if You See:

- > **LEAKING AROUND HOSE FITTINGS** can cause performance issues and inefficiencies.
- > **ABRASIONS** can cause equipment failure and put workers at risk of injury.
- > **EXPOSED WIRE REINFORCEMENT** is a sure sign of a need for replacement.
- > **DAMAGE TO OUTER COVER, SCUFFS OR NICKS** can cause leakage and safety concerns.
- > **TWISTED HOSE, KINKS OR BENDS** should be checked by a technician for routing issues.
- > **CRACKED OR CORRODED FITTING** will be seen as red rust created by the hydraulic fluid. This can cause forklift malfunction.

VISUAL INSPECTION:

- Hose showing signs of damage
- Hose showing signs of casing dry rot
- Hose showing signs of excessive stretch (no adjustment remaining)
- Hose due for replacement per the manufacturer guidelines
- Damage showing at the crimped fitting

OPERATIONAL INSPECTION:

- Hose showing signs of fluid seepage
- Hose not tracking on the pulley correctly due to nonadjustable stretch
